01

Introduction

**We created a
simple blog
platform where
users can
publish posts,
comment on
them, and edit
their profiles.**

02

Features and Functionality

Here are the features of the blog:

Publishing posts

the code includes the implementation of a "publish" Button that creates a new post when clicked which allows user to publish posts conveniently.

commenting

The code includes the implementation of a commenting feature where users can enter their comments.

User's profile

The code includes the implementation of a feature where users can edit their profiles and add email, bio etc.

03

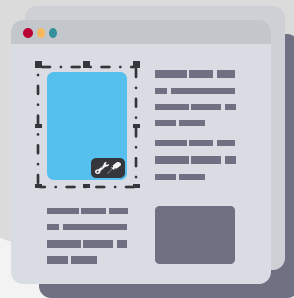

Demonstration

04

Conclusion

To wrap it up our blog showcases some dynamic features with the ability to publish posts, enable commenting, and edit profiles which provides a solid foundation for creating an interactive and engaging platform.
